The celebration equation

Having a full bar? Plan on a mix of 50% wine, 30% beer, and 20% spirits.

WINE:

 A Guest x B Drinks x 0.5 ÷ 5 =
750ml
Bottles Needed

BEER:

 A Guest x B Drinks x 0.3 =
12 oz
Servings Needed

SPIRITS:

 A Guest x B Drinks x 0.2 ÷ 15 =
750ml
Bottles Needed

Not serving cocktails? Plan on a mix of 60% wine and 40% beer

WINE:

 A Guest x B Drinks x 0.6 ÷ 5 =
750ml
Bottles Needed

BEER:

 A Guest x B Drinks x 0.4 =
12 oz
Servings Needed

A = Number of Guests
B = Drinks Per Guest (Based on length of party)

Need to know how many drinks per guest? Here's a guideline used by other couples: add how long your event is in hours, plus one.

**Only allowed in select states
+ Spirits where allowed by law
